

A NEW WAY TO GET LONGER, STRONGER LASHES...LVL LASH LIFT TREATMENT

Category: Gloss (Beauty/Fashion) ([Http://www.healthmagazine.ae/Blog/Category/Gloss/](http://www.healthmagazine.ae/Blog/Category/Gloss/)) | August 10, 2017

A favorite amongst celebrities and makeup artists alike, the LVL Lash Lift Treatment is the latest eyelash treatment in town that gives you longer, stronger, and more beautiful lashes...Here's the scoop...

The Basics

It is very important to understand that the LVL Lash Lift treatment is not an eyelash extension treatment. LVL stands for 'Length, Volume, Lift' and is designed to lift your natural eyelashes at the root, creating the effect of longer, thicker and lifted lashes without using eyelash curlers, mascara, or lash extensions. The treatment is ideal for anyone who cannot wear eyelash extensions, those who suffer with allergies such as hay fever, or anyone going on holiday who doesn't want that 'panda eye' look around the pool. LVL Lash Lift elongates, enhances and exaggerates your very own natural lashes whilst being highly fuss free with no need for maintenance treatments or removal.

The Process

Prior to the LVL Lash Lift treatment taking place, a patch test will be sent to you by the professional team at Nouveau Lashes. This is to thoroughly check that you are not allergic to any of the products before the treatment takes place. Once it has been determined that you are able to have the treatment you will be booked into one of Nouveau Lashes partnering salons.

The treatment takes 45 minutes and to begin your lashes are gently pulled back over a silicon shield and coated in a 'Lifting Balm' for approximately 10 minutes depending on the health of your lashes. This is then followed by a 'Volumizing Fix', tint and Moisturizing Serum. As this is a closed-eye procedure you will be able to lie back and relax while your fully trained and experienced therapist works her magic.

Results

LVL Lash Lift lasts for six to eight weeks. The treatment creates the effect of longer, thicker and lifted lashes and after the treatment, thanks to the added collagen your improved lashes will be visible immediately.

RECENT POSTS

Different Looks

This treatment is designed for your own natural lashes and lifts the eyelashes at the root, creating the effect of longer, thicker and lifted lashes. The shield used to lift the lashes offers three different sizes depending on how dramatic you would like your look to be. As part of the treatment, your eyelashes will be treated to a tint, creating a beautiful black mascara-style effect. Lashes will most certainly appear longer than they were before the LVL Lash Lift treatment.

Details

The LVL Lash Lift treatment is available at The Nail Pavilion, Kozma & Kozma and Pastels Beauty Salon. For more details, visit: www.nouveaulashes.com/lvl-enhance-the-natural-lash-lift (<https://nouveaulashes.com/lvl-enhance-the-natural-lash-lift>)
